Endel releases 5 new mood-based albums for its “Relax” series today

Personalized sounds to reduce stress and increase focus via iOS, Android & Amazon Alexa apps

Today Endel releases five new mood-based albums for its “Relax” series: Clear Afternoon, Rainy Afternoon, Rainy Evening, Cloudy Morning and Foggy Morning. Endel is a technology that produces personalized soothing soundscapes to reduce stress, increase focus and improve sleep. Backed by science, it generates real-time sounds based on user inputs such as location, time, heart-rate and cadence that allow users to improve focus and relaxation and focus via its IOS, Android and Amazon Alexa apps. These sounds are meant to fine-tune the mind and body for daily tasks and goals.

They will be releasing their additional mood-based albums for “Focus” and “On-The-Go” series in the coming months.
